(Segment Information)

(1) Description of reportable segments

The Group's reportable segments are components of the Group for which separate information is available and evaluated regularly by the Board of Directors in deciding how to allocate management resources and evaluating operating segment performance. Each operating segment is controlled by each consolidated subsidiary since each company provides different services.

Accordingly, the Group consists of operating segments differentiated by the services each company provides, and the reportable segments are mainly "Banking," "Leasing," and "Securities."

The "Banking" segment provides diversified financial services such as deposit-taking and lending. The "Leasing" segment is engaged in leasing services and installment sales of properties and goods. The "Securities" segment provides brokerage services for financial instruments.

(2) Methods of measurement for the amounts of ordinary income, profit or loss, assets, liabilities and other items for each reportable segment

Intersegment income is based on arm's length prices.

(3) Information about ordinary income, profit or loss, assets, liabilities and other items was as follows:
