## Cross points of land transportation in Western Japan

Two east-west highways (SANYO EXPWY and CHUGOKU EXPWY) and a highway from the Sea of Japan to the Pacific Ocean via the Seto Inland Sea intersect at two locations in the prefecture.

Construction of the **Mimasaka-Okayama Road** is under way, with the aim of creating a circular highway network within the prefecture.

### □ Logistics bases

- The prefecture hosts the largest warehouse area in the Chugoku-Shikoku region.
  - Warehouses are located in an area within two hours of the Okayama interchange.
- Population: Over 16 million

### □ Plant locations

- The plants are located in places where the climate is mild and disasters are rare.
- The plants have abundant sunshine and water.

### □ Great Seto Bridge

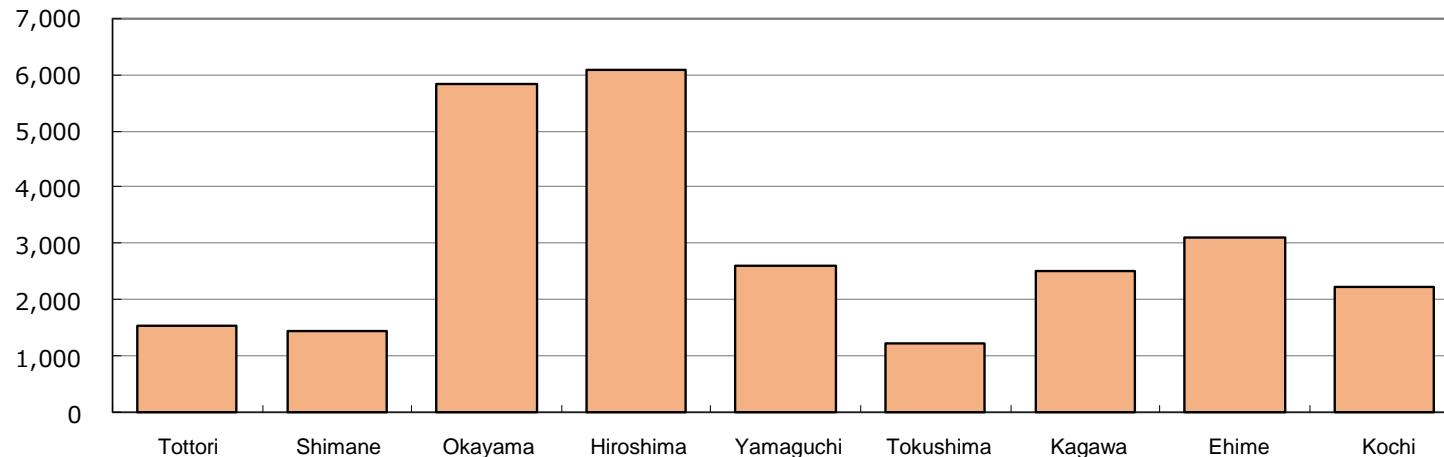

- Okayama and Shikoku form a single economic zone.
- The number of people using this bridge within the zone is the highest of the three routes.

## Hints for Solving Japan's Problems in Okayama's Heartland

### Disaster prevention

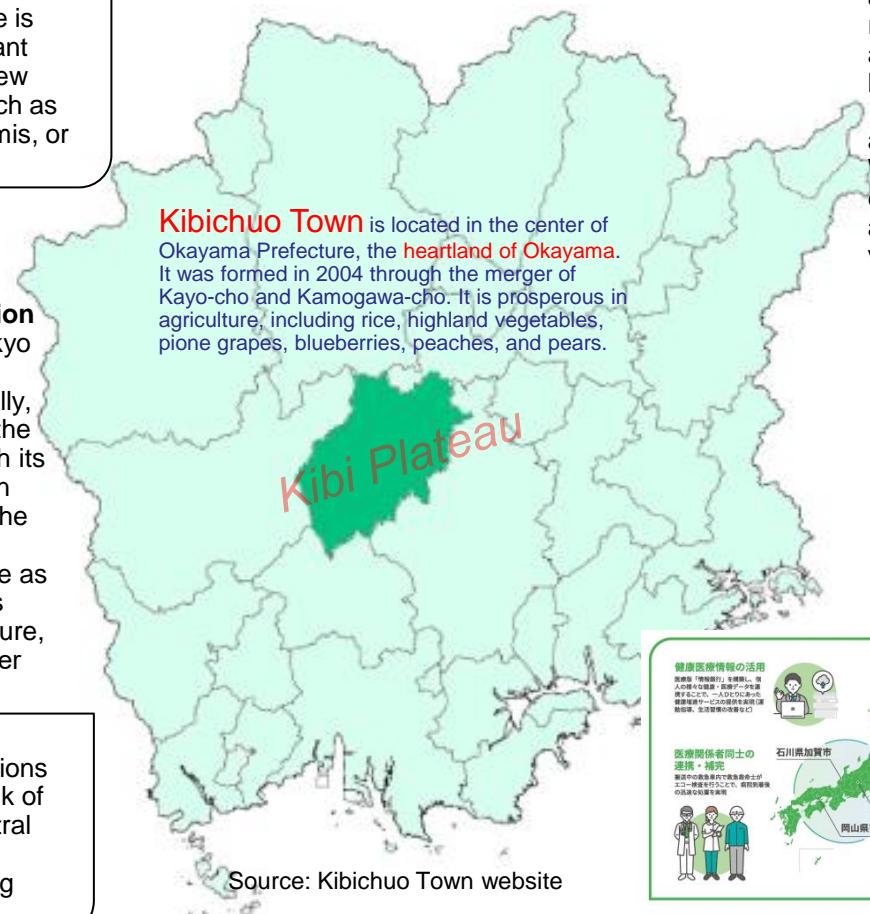

The **Kibi Plateau** is located halfway between the Chugoku Mountains and the Seto Inland Sea, including **Kibichuo Town**, and consists of mountains 300 to 700 meters above sea level stretching across Hiroshima, Okayama, and Hyogo Prefectures. In recent years, various studies have revealed the solidity of its ground.

Okayama Prefecture is blessed with abundant sunshine and very few natural disasters such as earthquakes, tsunamis, or typhoons.

### Regional revitalization

**Regional decentralization** and concentration in Tokyo are like two sides of the same coin. Geographically, if Tokyo is the center of the east, then Okayama, with its convenient transportation access, is the center of the west. Some say that **Kibichuo Town** is suitable as the capital because of its transportation infrastructure, mild climate, and “disaster resilience.”

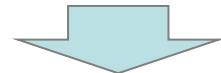

Relocation of capital functions to local regions will help avoid the risk of concentration of central functions. It is also effective in preventing infectious diseases.

### Community development

**Kibi Kogen City**, the basic concept, which was formulated in 1975, is a plan to build a community city toward the 21st century, equipped with advanced functions in various fields such as health and welfare, education and culture, industry, and recreation, in **Kibichuo Town**, a town blessed with a natural environment and access to a wide-area highway transportation network.

The plan called for a population of 30,000 in an area of 1,912 hectares (equivalent to Shinjuku Ward, Tokyo), but after the collapse of the bubble economy, the project did not proceed as expected, and the scale was substantially reduced, leaving vast undeveloped land.

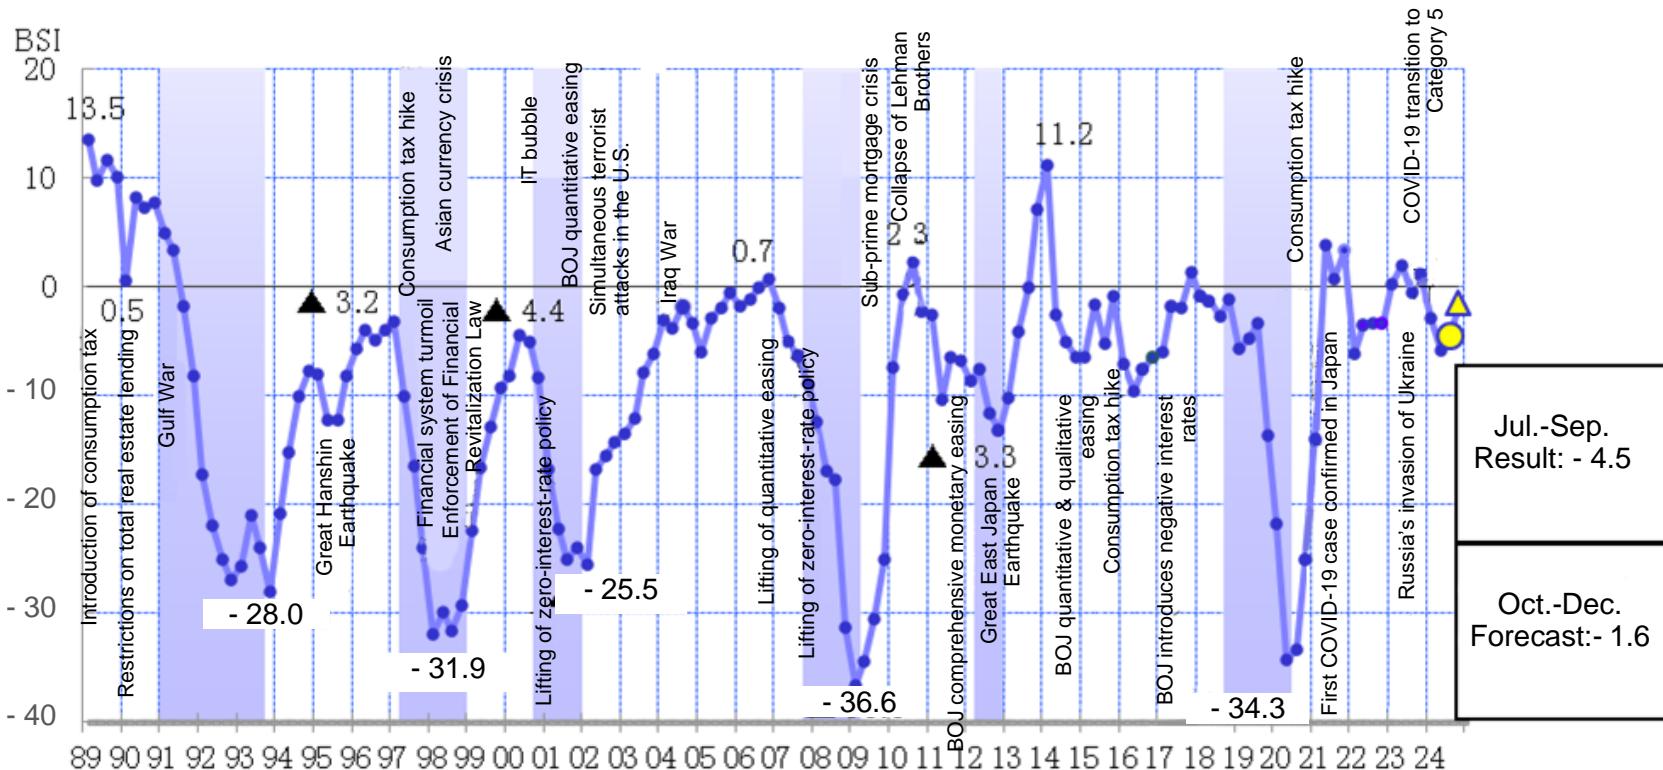

Designated as a model city for the “Digital Rural Health Special Zone,” along with Kaga City in Ishikawa Prefecture and Chino City in Nagano Prefecture, the city focuses on solving issues related to health and medical care through the use of digital technology and deregulation.

Expected to serve as a model for focused efforts to solve issues in the health and medical fields in mountainous areas by utilizing digital technology

# Economic Conditions of Okayama Prefecture

The economy of Okayama Prefecture is gradually recovering despite the impact of rising prices.

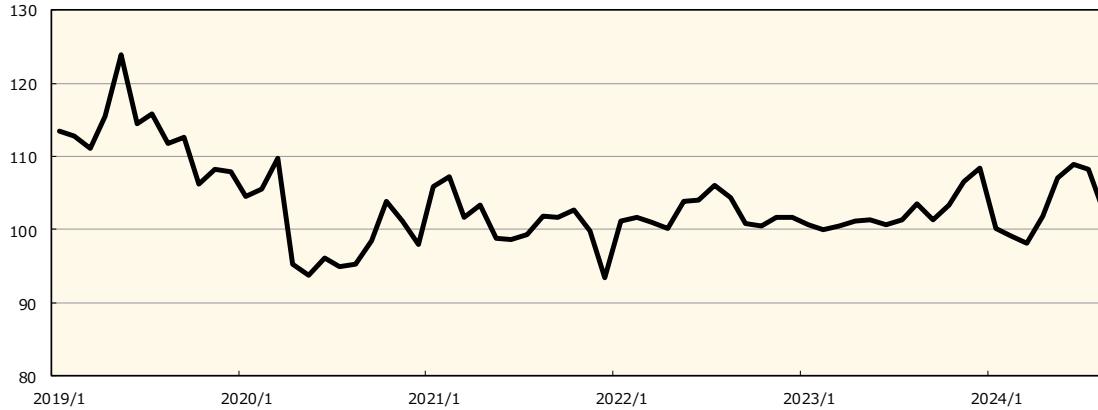

Shaded areas represent periods of economic recession (as determined by the Cabinet Office).

The BSI (Business Survey Index) is designed to measure corporate managers' confidence in sales and business conditions, as well as their forecasts for their company's performance (favorable turnaround, unchanged, or deterioration). A favorable turnaround quarter-on-quarter or year-on-year warrants a grade A, while unchanged performance warrants a B, and deterioration a C ( $A+B+C=100$ ). The BSI is calculated by using the following equation:  $(A-C)/2$ . Consequently, the more corporate managers there are who indicate their company's performance is undergoing a positive turnaround, the closer the index approaches 50. Conversely, the more respondents there are who determine their performance is deteriorating, the closer the index approaches -50.

# Local Economic Trends (2)

## Industrial production: Gradually on the rise

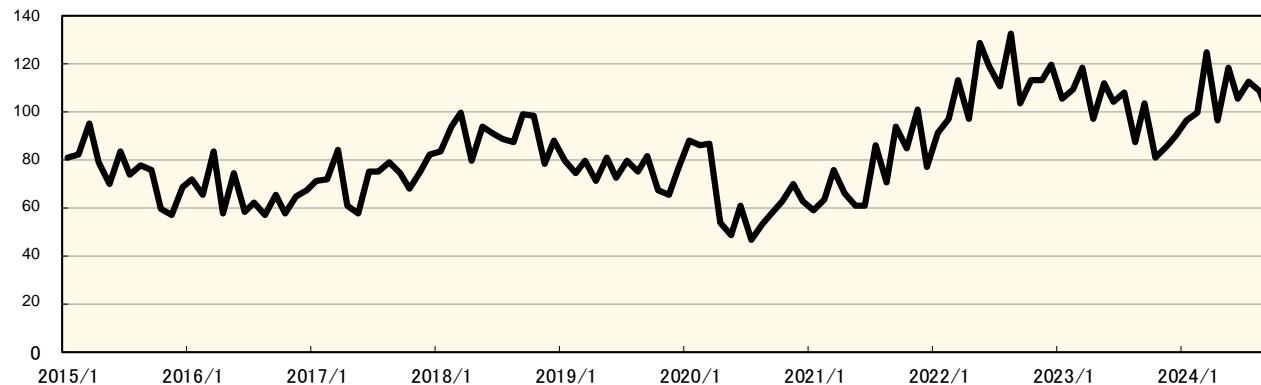

[Industrial production index] (2020 indexed at 100; seasonally adjusted)
